# *Ali Wong*
Baby Cobra

Data Visualizations

In the following dashboard, I created three Visualizations regarding Ali Wong's stand up comedy Netflix special "Baby Cobra".
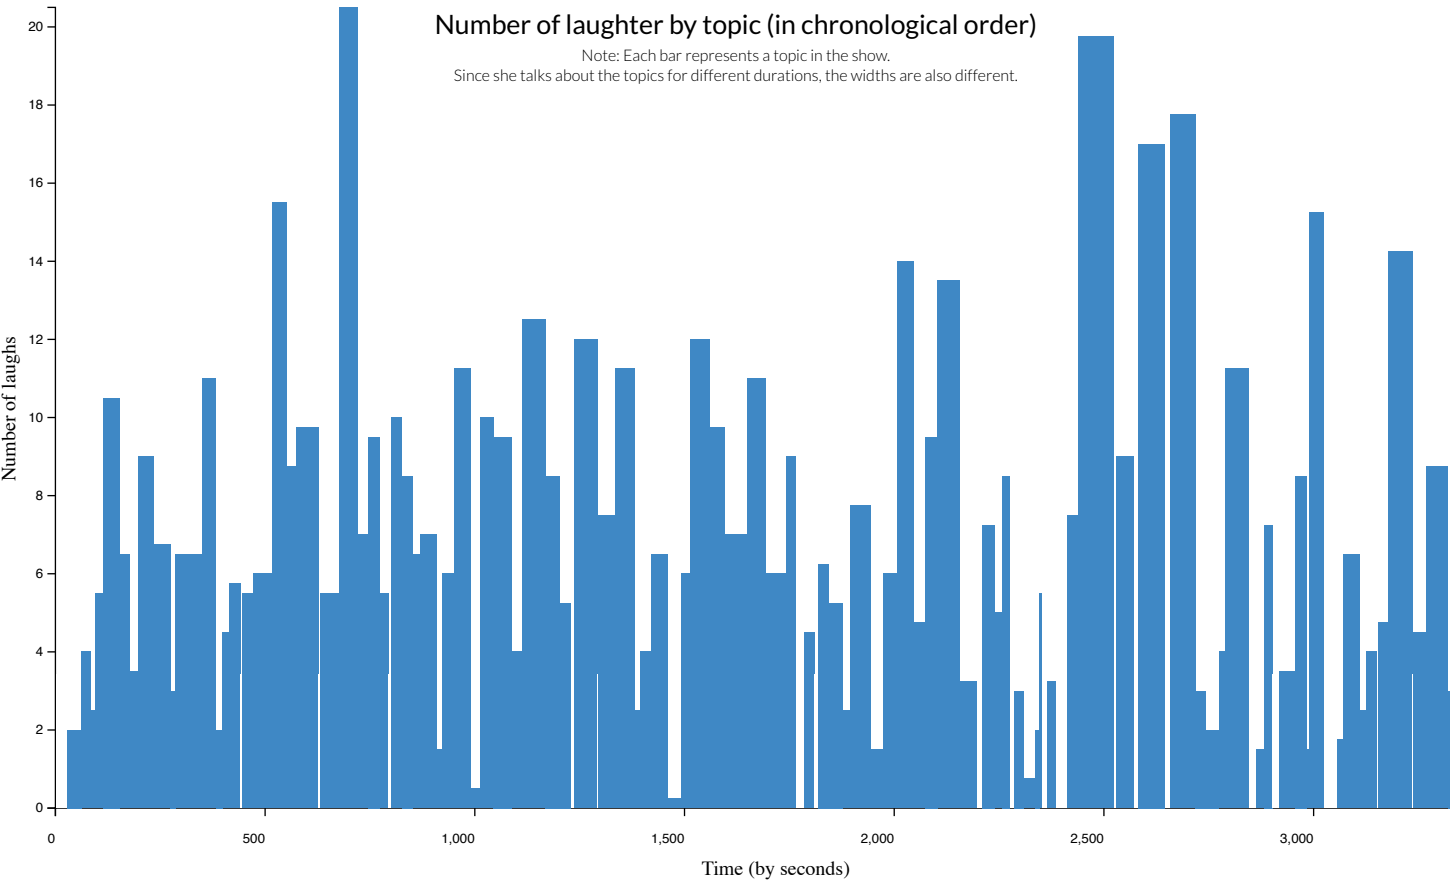

Ali Wong's tour frequency in each state, 2015-2017

Ali Wong toured through 12 states around the timeframe where she released Baby Cobra. Let's see where these visits were!

Tours: 8.00

Legend of visits

0   2   4   6   8   10

That's a lot of states! Let's take a deeper dive into Ali Wong's Baby Cobra script. What makes it so popular?
In the following visualization, I graphed each segment of the show (based on its topic) based on their time, and show the number of laughters that she got for each topic.
There are some topics that received 0 laughs. For clarity, when your mouse move over to where they are, a tooltip will show and display which topic it was.

Number of laughter by topic (in chronological order)

Note: Each bar represents a topic in the show.
Since she talks about the topics for different durations, the widths are also different.

Now let's explore further in what makes these topics so funny.
I encoded a couple over-arching themes that repeats throughout the show.
I hand-collected data on each topic Ali Wong talked about, their corresponding theme, and the references they make to each other.
They are shown in this graph - that's a lot of references!

You can also notice that a lot of the earliers topics are called back in the end, and that the end contains even more references to the beginning of the show.
What makes Ali Wong's Baby Cobra so funny is truly the callbacks.

Baby Cobra Topics and Their References

Legend of themes

- ● getting older
- ● marriage
- ● working
- ● poop
- ● sex
- ● pregnancy
- ● miscarriage

Topics

Note: each node's size references the number of times it has been referenced
